

I know how to look after the school devices and keep safe when I am on them

I never use the devices to be mean to someone

I care for the device by holding it with two hands and walking with it

I use the devices to help my learning

I put the devices back in the right place when I have finished with them

I only go on websites or apps that my teacher has told me about

I remember to take breaks when I am on a device and I sit properly when I am using one

I don't give my name, address, passwords, school or phone number to anyone online

I will only use a device if my teacher lets me

I share the device with other people so we can all have a turn
